

RAGHVENDRA PATEL

Full-Stack Developer (MERN)

Bhopal, Madhya Pradesh, India | +91 8815945446 | raghvendrapatel1108@gmail.com
[GitHub: github.com/RaghvendraPatel](https://github.com/RaghvendraPatel) | [LinkedIn: raghvendra-patel](https://www.linkedin.com/in/raghvendra-patel) | [Portfolio: raghvendra.online](https://raghvendra.online)

SUMMARY

Final-year Computer Science student and Full-Stack Developer skilled in the MERN stack (MongoDB, Express.js, React, Node.js). Built and deployed 3 full-stack applications with JWT authentication, role-based access, and REST APIs, alongside a Full-Stack Development internship. Solved 150+ DSA problems on LeetCode and GeeksforGeeks.

TECHNICAL SKILLS

Languages & Fundamentals: JavaScript, Java, C++, Python, HTML5, CSS3 | Data Structures, Algorithms, OOP, DBMS

Frameworks & Libraries: React.js, Node.js, Express.js, Context API/Redux, REST APIs, JWT Authentication, Socket.IO

Databases: MongoDB, Mongoose, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, Tailwind CSS, Bootstrap, Vercel, AWS S3

EXPERIENCE

Full-Stack Development Intern

Jun 2025 – Aug 2025

Hashedbit Innovation (Virtual)

Remote

- Developed and shipped React frontend features, and debugged/resolved issues in existing components, using JavaScript, HTML, and CSS across multiple internship projects.
- Collaborated with senior engineers through structured code review cycles; managed all work with Git and GitHub version control.

PROJECTS

VidishaMart — Hyperlocal Quick-Commerce Platform

React, Node.js, Express, MongoDB, Mongoose, Tailwind CSS, JWT

github.com/RaghvendraPatel/VidishaMart

- Engineered 9 React pages across customer and owner workflows — authentication, shop discovery, product browsing, cart/checkout, order tracking, and product management — with reusable components (protected routes, cards, empty states).
- Implemented JWT authentication with role-based route protection for separate customer and owner flows; managed auth and cart state via Context API, persisted through localStorage.
- Designed and integrated 10+ RESTful endpoints (auth, shops, products, orders) using Axios with a Bearer-token request interceptor; backend built on Node.js, Express, and MongoDB/Mongoose.
- Built a fully responsive UI with Tailwind CSS, structured around reusable components for consistent UX across customer and owner views.

GitHub Clone — Full-Stack Developer Platform

React, Vite, Node.js, Express, MongoDB, Socket.IO, JWT, AWS S3

github.com/RaghvendraPatel/Github-Clone

- Developed a GitHub-inspired platform with JWT authentication, user profiles, follower/following relationships, and repository CRUD with public/private visibility.
- Built issue-tracking, pull-request, comment, and contribution-heatmap features backed by Express REST APIs and MongoDB.
- Engineered a Git-style CLI (init, add, commit, push, pull, revert), storing commit snapshots in AWS S3.

Zerodha Clone — Trading Platform UI

React, JavaScript, Node.js, Express.js, MongoDB

github.com/RaghvendraPatel/Zerodha-Clone | Live deployment on Vercel

- Built a Zerodha-inspired trading dashboard with authenticated, protected routing and responsive views for holdings, positions, funds, and market watch.
- Deployed the application live on Vercel with a Node.js/Express/MongoDB backend.

EDUCATION

B.Tech, Computer Science & Engineering

2023 – 2027 (Expected)

Samrat Ashok Technological Institute (SATI), Vidisha — RGPV University

CGPA: 7.79 / 10

CERTIFICATIONS

Courses: Full-Stack Web Development (Udemy) • Data Structures & Algorithms (Apna College)

CODING PROFILES

- LeetCode: 69 problems solved (25 Easy, 37 Medium, 7 Hard), 82.6% acceptance rate.
- GeeksforGeeks: 88 problems solved (Basic, Easy, Medium, Hard).
